

ASTRO-05 and ASTRO-15

Astronomical & Prayer Time Switch

KAELE ASTRO Software

CON-3
Usb to infrared data transmitter

Area of Usage:

- Heating systems in mosques according the prayer times
- Park, garden and farm irrigation
- Street, park, garden illuminations
- ATM ,store window, billboard illuminations

General:

ASTRO is a digital time switch that calculates the sunset, sunrise and prayer times by using coordinates and real time clock. It operates according to the program setting and it has no need for a photocell sensor. Device could be used as astronomical, prayer or digital time switch.

ASTRO has two reserves to protect the real time clock and calendar against power outage.

For long term reserve there is CR2032 battery. If the device is powered, battery life is approx. 5 years. When the battery life is expired, the user is able to replace the battery easily.

Super capacitor is used for short time power failures. It supplies the device for 3-7 hours. In this case battery is not used, so battery level is conserved.

NOTE1: Before commissioning the device, please insert the battery into the battery compartment .

NOTE2: If the device is not powered, ASTRO automatically enters power save mode to conserve the battery life. When the device is in this mode LCD screen is turned off. The screen would turn on when pressing any button and so the user would be able to change the settings and programming the device manually. After 15 seconds of inactivity, the screen would be turned off again.

NOTE3: 4 preset programs are available on the device.

Program 1 :	Relay A	Astro	Sunset	ON
Program 2 :	Relay A	Astro	Sunrise	OFF
Program 3 :	Relay B	Astro	Sunset	ON
Program 4 :	Relay B	Time	00:00	OFF

Push in this direction and remove the battery cover

Insert the battery with the positive(+) side facing up as shown in the figure.

Make sure the battery is seated correctly in the battery slot. Replace the battery cover.

User replaceable battery

2 Relay Output (8A) ; ASTRO-05

2 Relay Output (16A) ; ASTRO-15

No Backlight ; ASTRO-05

Backlight ; ASTRO-15

Easy to use with English menu

Real time clock and calendar

56 programs

Prayer, astronomical or/and time switching function

Preset and adjustable Fajr and Isha twilight angles

Automatic or manual summer/winter time option

ON/OFF switching times

Easy to program with PC Software

Optical loading the programs with CON-3 Device

Graphical simulation program for both outputs

Automatic sunrise/sunset calculation using coordinates and time

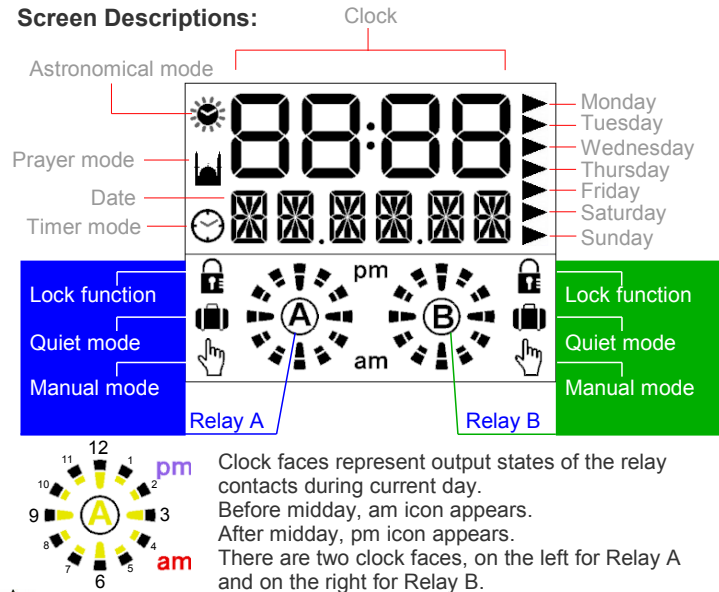

Offset for adjustable programming of sunrise/sunset times

Quiet mode

2 Manual modes

PIN code protection

Screen Descriptions:

Warnings:

- The connection of device must be done by authorized technical service staff according to the wiring diagram.
- Before making the connections to device's terminals, please be sure that there is no voltage across the cables or terminals. Also be sure that the panel is de-energized.
- Before cleaning the device, please be sure that it is de-energized and use only dry tissue-paper to clean it. Water or any other chemicals used for cleaning may harm the device
- Before commissioning the device, please be sure that the terminal connections are made exactly the same as in the connection diagram
- To protect the device, please mount it on DIN rail in a panel.
- Contact your authorized dealer, if a problem occurs with your device.

Following the precautions is to prevent the users from physically and spiritual damage. The manufacturer is not responsible for any injuries or damages due to violation of the warnings.

Button Functions:

ASTRO is an easy to use device with 3 buttons.

- ▼ : Press to move between menus or decrease the related parameter.
- ▲ : Press to move between menus or increase the related parameter.

SET : Press to go into the menu or save the related parameter.

- ▼ ▲ : Press two buttons at the same time to go back to the pre-menu screen
- Press two buttons long at the same time to return to the main screen.

MANUAL MODE

Manual mode is used for setting or testing the desired relay output, or deactivating the program operation. This mode could be activated for both of the relays separately. If output A is locked it can't be switched to manual mode for output A, but it can be switched for output B. For blocking the activation of manual mode, the related output should be locked. Lock function is described on page 7. There are two different manual modes.

1-TEMPORARY MODE : When the subsequent program steps in, temporary manual mode would be deactivated.

Temporary manual mode for Relay A :

Push ▼ button until the flashing hand icon appears on the left of the screen.

Throughout the manual mode, for changing Relay A output, it is necessary to push and release ▼ button.

In this mode, if the subsequent program for Relay A changes the output, manual mode would be deactivated automatically and ASTRO operates the program. Otherwise manual mode would continue to be active for Relay A.

To deactivate this mode for Relay A as an option, push ▼ button until the flashing hand icon disappears.

Temporary manual mode for Relay B :

Push ▲ button until the flashing hand icon appears on the right of the screen.

Throughout the manual mode, for changing Relay B output, it is necessary to push and release ▲ button.

In this mode, if the subsequent program for Relay B changes the output, manual mode would be deactivated automatically and ASTRO operates the program. Otherwise manual mode would continue to be active for Relay B.

To deactivate this mode for Relay B as an option, push ▲ button until the flashing hand icon disappears.

2- PERMANENT MODE : It is only possible to deactivate permanent mode as manually.

Permanent manual mode for Relay A:

Push ▼ and SET buttons at the same time until the hand icon appears on the left of the screen.

Permanent manual mode is not deactivated automatically. The only way to deactivate this mode is manually.

Throughout the manual mode, for changing Relay A output, it is necessary to push and release ▼ button.

To deactivate this mode for Relay A, push ▼ button until the hand icon disappears.

Permanent manual mode for Relay B:

Push ▲ and SET buttons at the same time until the hand icon appears on the right of the screen.

Permanent manual mode is not deactivated automatically. The only way to deactivate this mode is manually.

Throughout the manual mode, for changing Relay B output, it is necessary to push and release ▲ button.

To deactivate this mode for Relay B, push ▲ button until the hand icon disappears.

MENUS:

Press SET button on the main screen to access the menus. If the lock function is deactivated, PROG menu appears on the screen. Use the direction buttons to see ADJUST,DISPLY and EXIT

information :

In this menu, program and device settings could be monitored without making changes. Use the direction buttons to see information about sunrise, sunset, programs, memory status, season (summer-winter), latitude, longitude,quiet mode status.

PROGRAM:

All program settings could be done. Creating new program, changing or deleting an existing program.

ADJUST:

Device settings could be done.

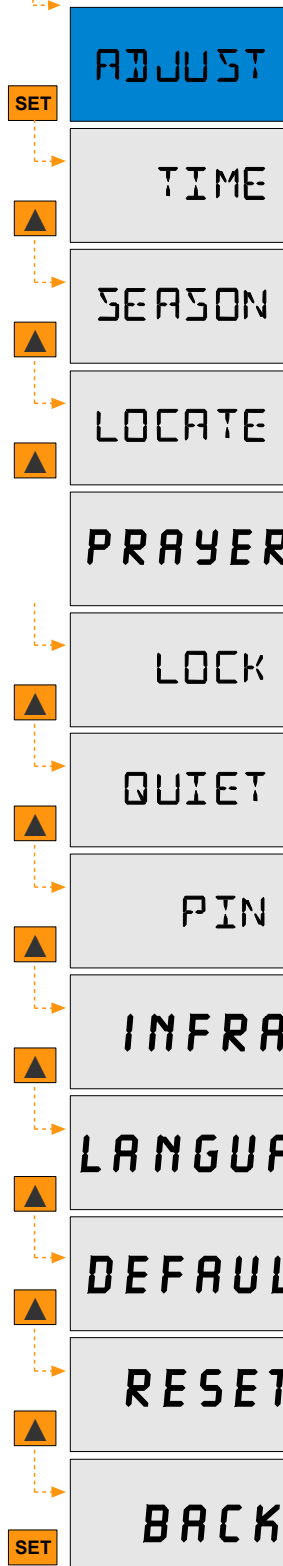

PROGRAM MENU:

Press SET button on PROG screen to access the Program Menu. Use the direction buttons to see NEW,CHANGE,DELETE and EXIT menus.

NEW : New programs are created.

CHANGE : Existing programs could be changed.

DELETE : Existing programs could be deleted. It is possible to delete all of them or the selected one.

ADJUST MENU:

In this menu, device settings could be done.

Real Time Clock and Calender could be set in TIME menu

In this menu, daylight saving time settings could be done. If AUTO is chosen, device determines beginning dates of the summer and winter automatically.

Coordinates and time zone settings of the location could be done in this menu.

Prayer times calculation method could be set in this menu.

Lock function could be activated to prevent unauthorized persons from using the device. This mode could be activated for both of the relays separately.

Quiet mode could be activated to stop the program operation for a certain period.

In this menu, PIN code could be changed. PIN code is a 4 digit number.

Infrared (con03) communication could be Enabled or disabled

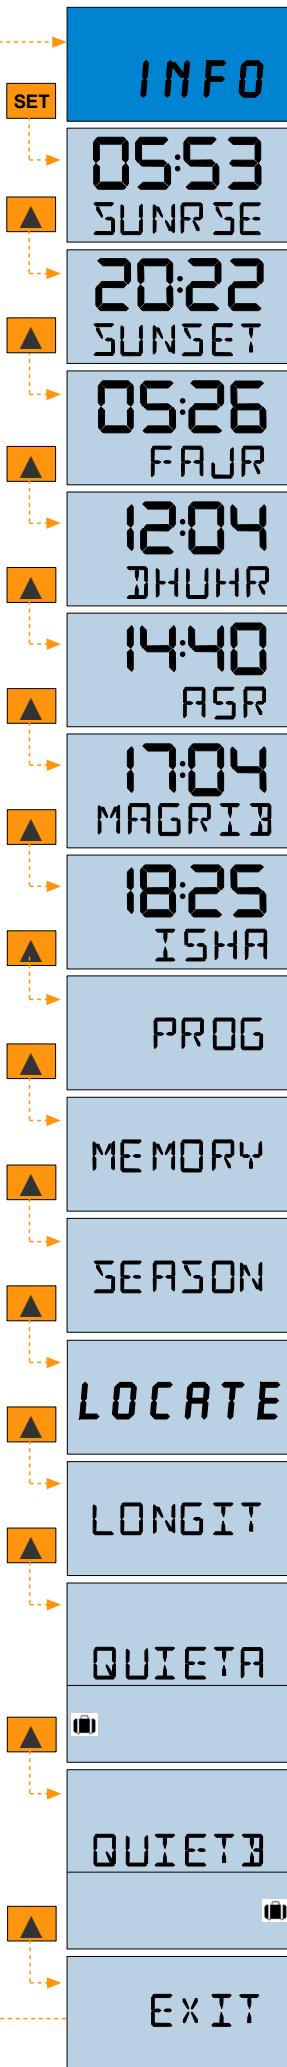

Language could be changed to turkish or english

All device settings except time and date are set to default.

The device could be restarted time and date Settings would be cleared.

DISPLAY

In this menu, information about sunrise, sunset, prayer times, programs, memory status, season (summer-winter), latitude, longitude, quiet mode status could be monitored.

Sunrise time of the related location.

Sunset time of the related location.

Fajr time of the related location.

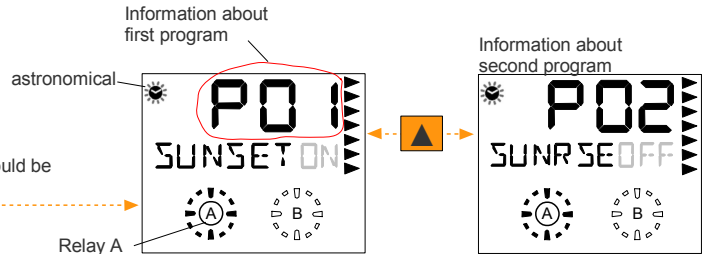

Dhuhr time of the related location.

Asr time of the related location.

Maghrib time of the related location.

Isha time of the related location.

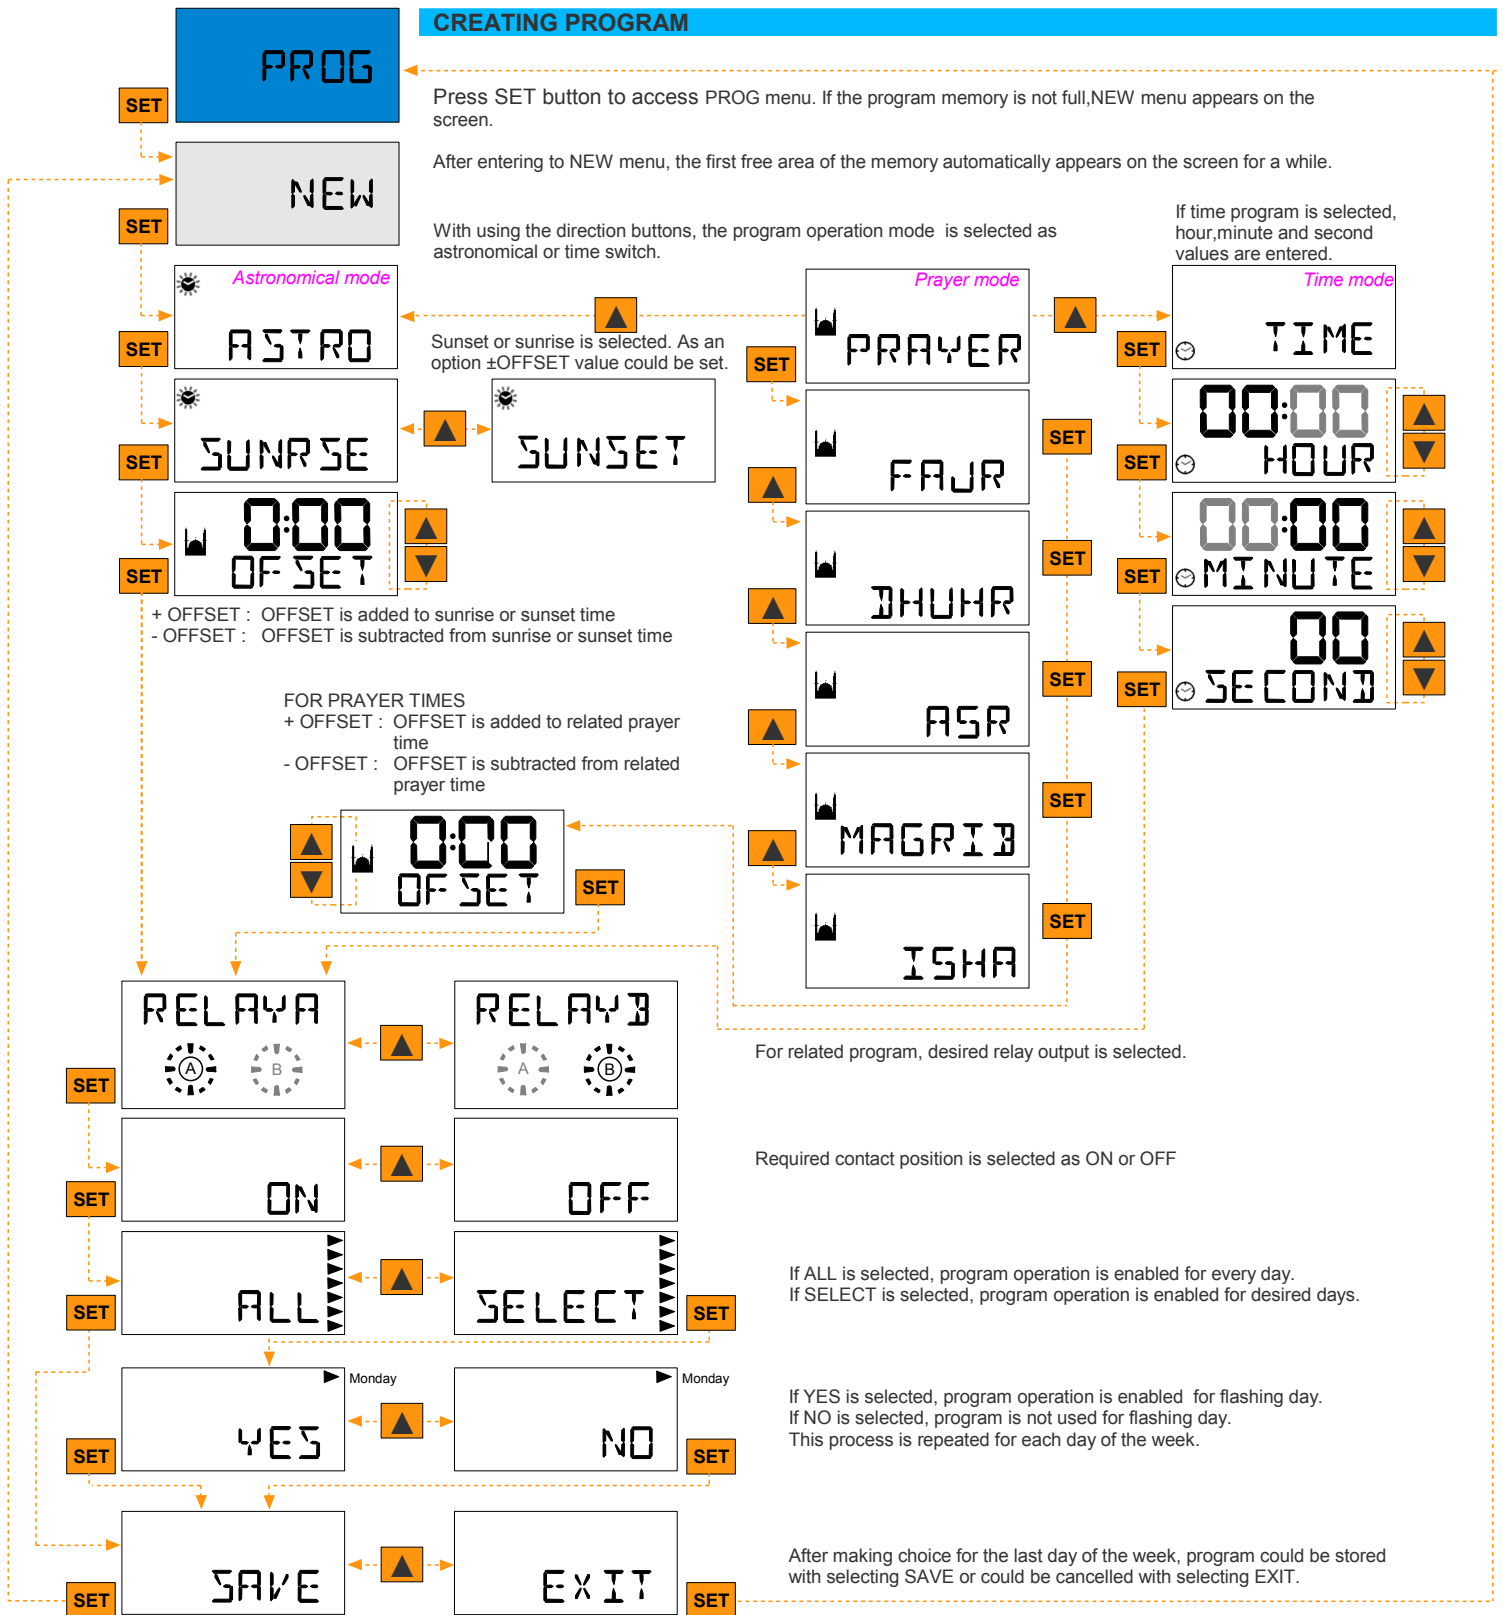

All contents of the programs could be observed.

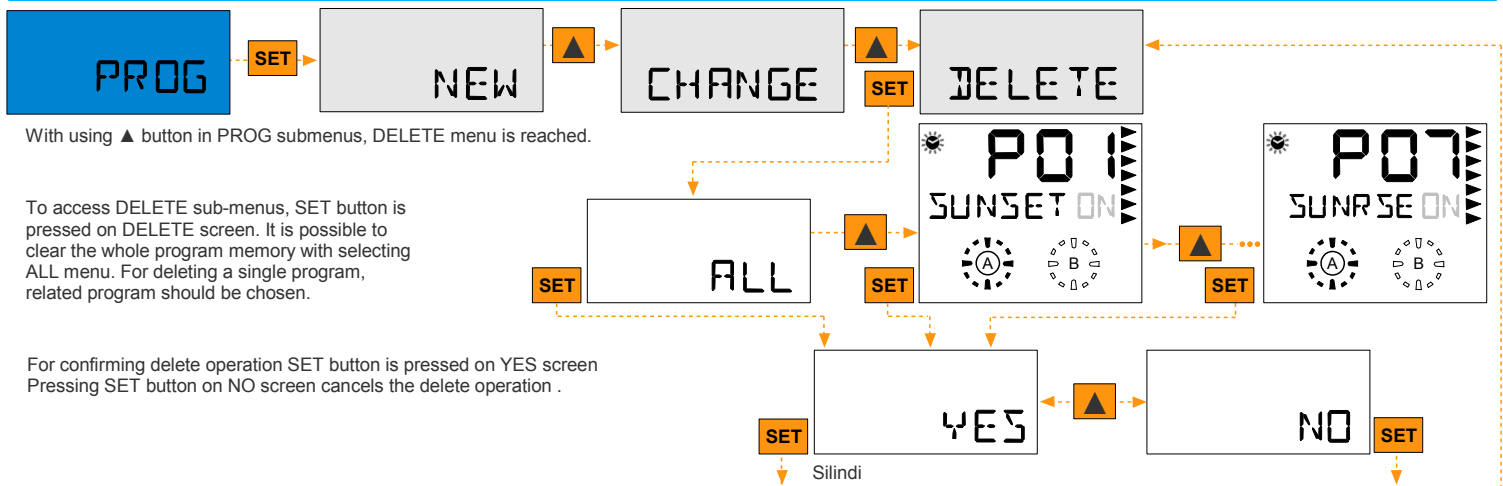

To activate Quiet mode for 1 day, start and stop date should be set as same day.

CREATING PROGRAM

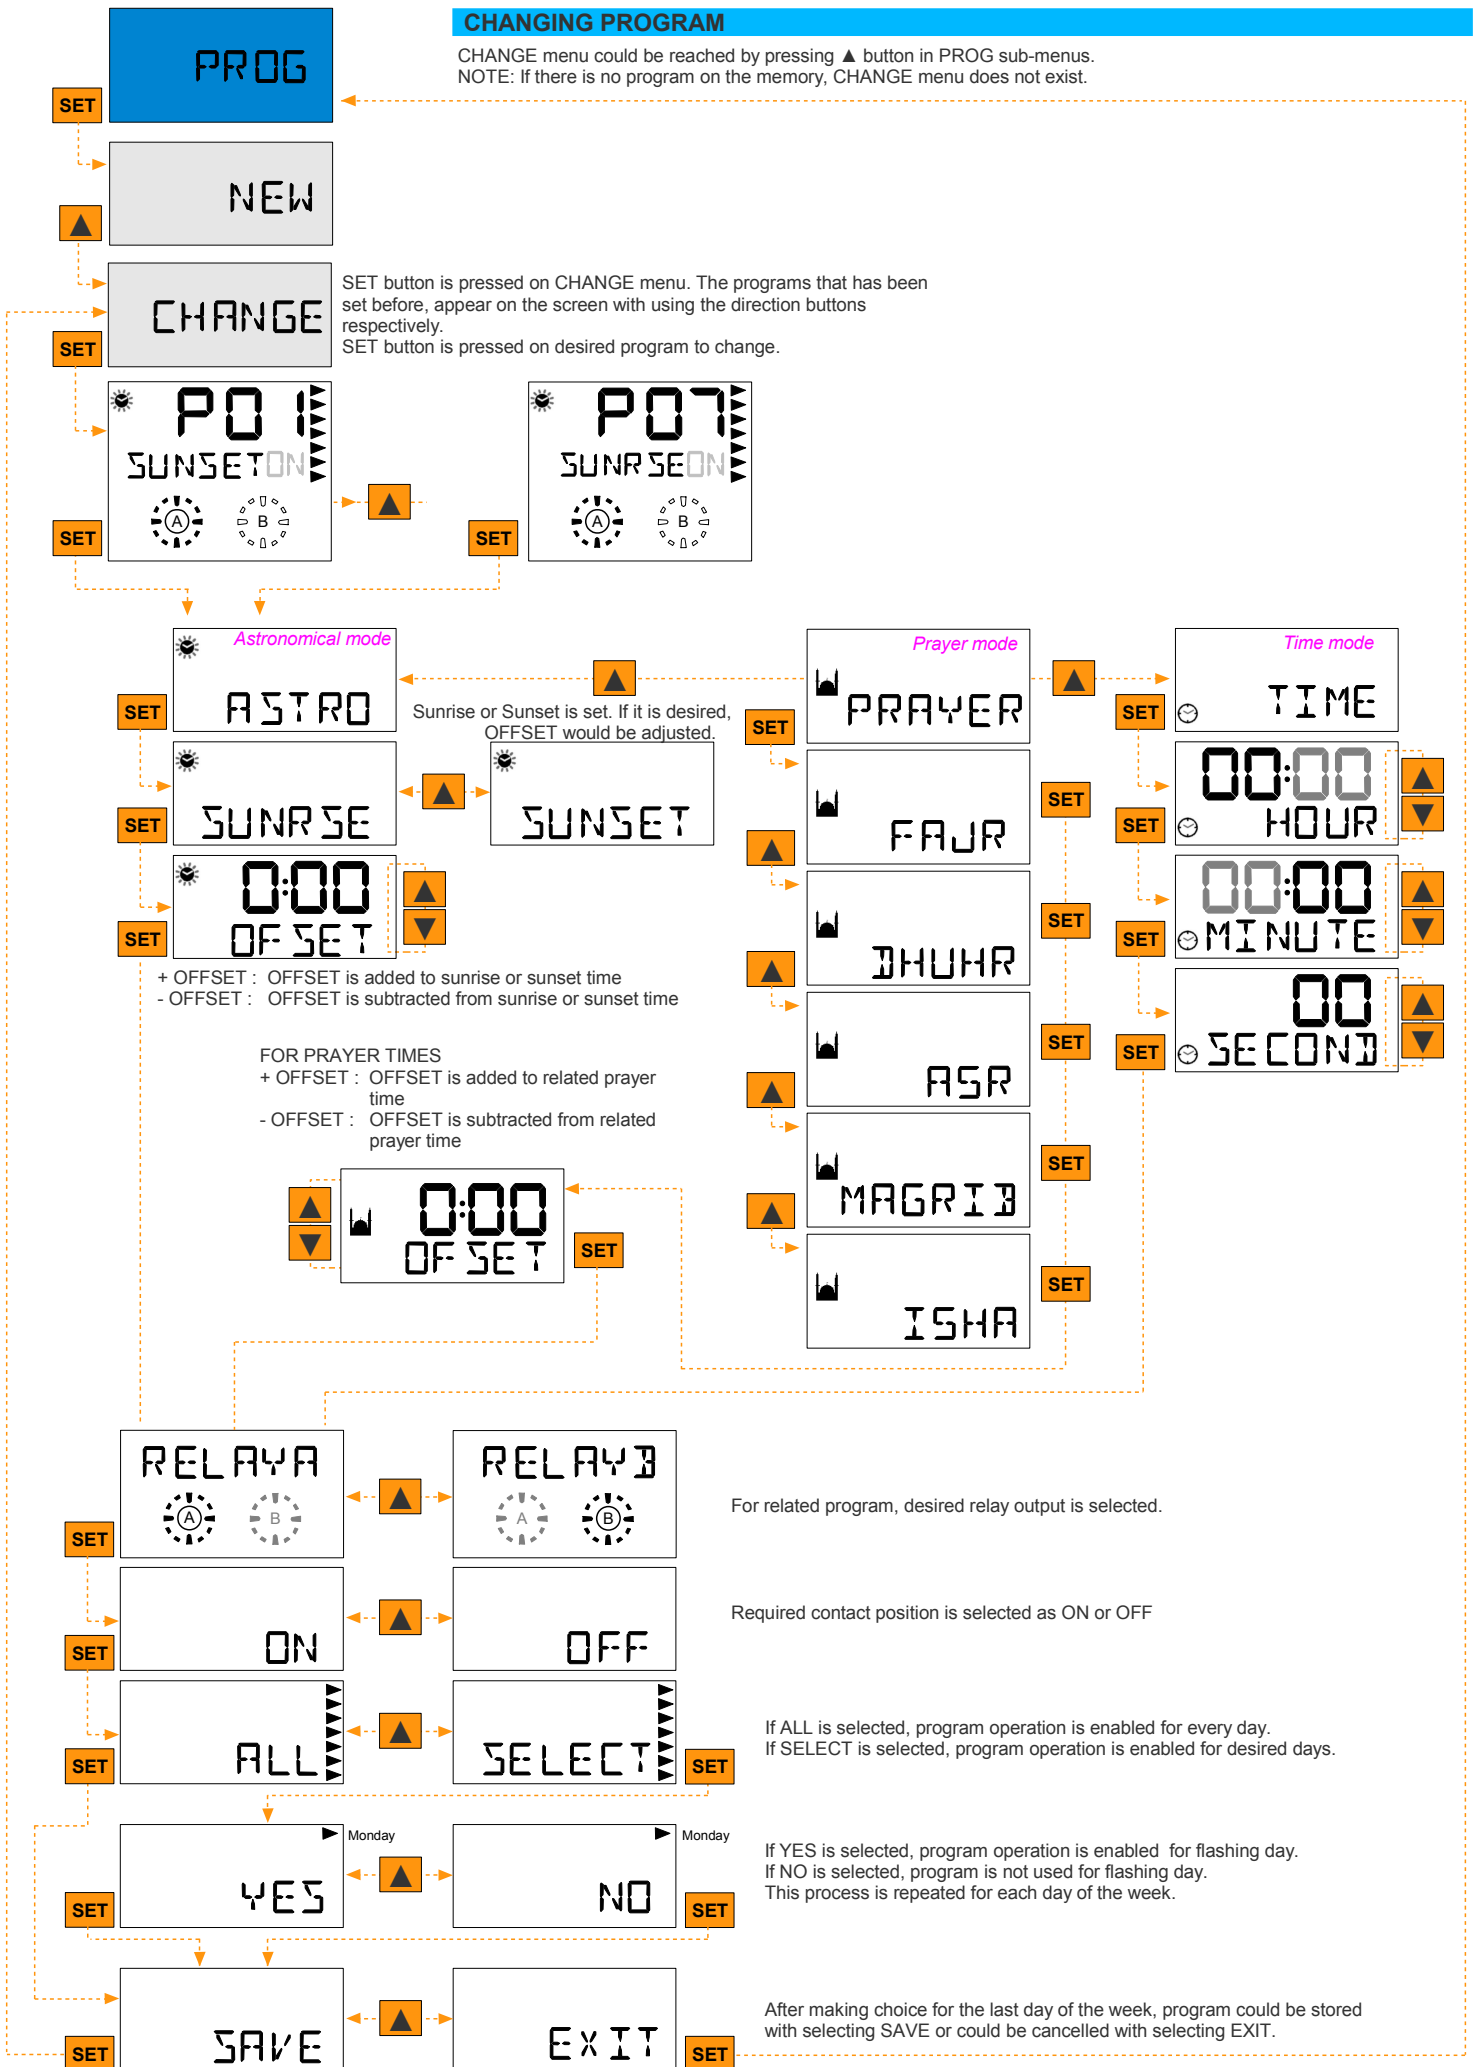

DELETING PROGRAM

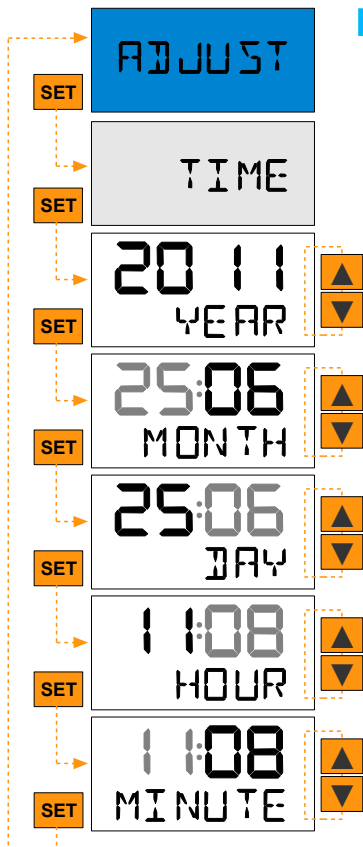

CHANGING PROGRAM

CHANGE menu could be reached by pressing ▲ button in PROG sub-menus.
NOTE: If there is no program on the memory, CHANGE menu does not exist.

TIME AND DATE

In ADJUST sub-menus could be accessed TIME menu.

With using ▼▲ buttons, year value is increased or decreased. When desired value is reached, it is stored by pressing SET button.

With using ▼▲ buttons, month value is increased or decreased. When desired value is reached, it is stored by pressing SET button.

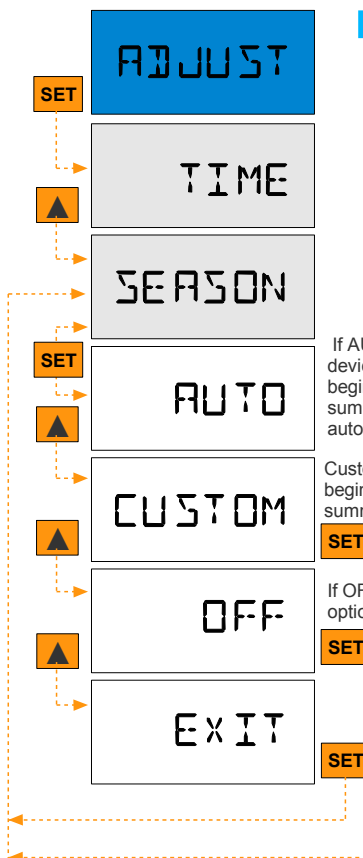

With using ▼▲ buttons, day value is increased or decreased. When desired value is reached, it is stored by pressing SET button.

With using ▼▲ buttons, hour value is increased or decreased. When desired value is reached, it is stored by pressing SET button.

With using ▼▲ buttons, minute value is increased or decreased. When desired value is reached, it is stored by pressing SET button.

SEASON

SEASON menu could be reached by pressing ▲ button in ADJUST sub-menus.

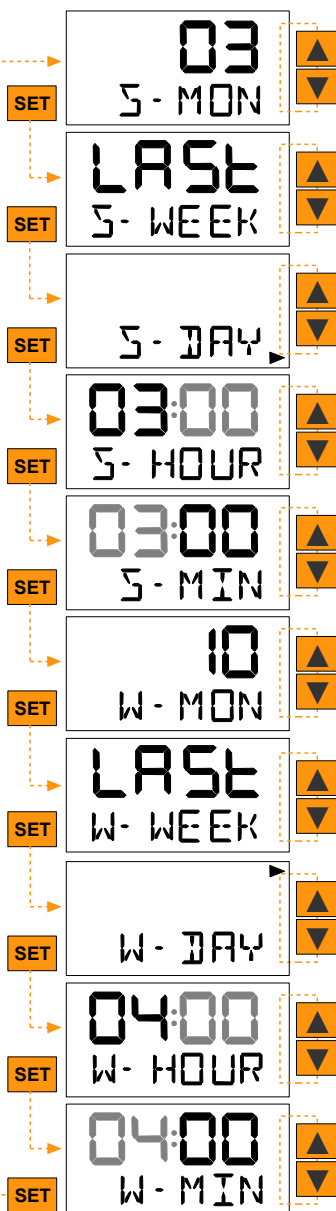

If AUTO is chosen, device determines beginning dates of the summer and winter automatically

Custom dates for beginning of the summer and winter

If OFF chosen, daylight saving option is disabled.

NOTE:
Auto Season mode
winter→summer change: last Sunday in March 03:00:00
(Clocks are adjusted forward one hour)
summer→winter change: last Sunday in October 04:00:00
(Clocks are adjusted backward one hour)

First parameter of custom season setting is beginning month for the summer season. With using ▼▲ buttons, month value is increased or decreased. When desired value is reached, it is stored by pressing SET button

Second parameter is beginning week for the summer in chosen month. With using ▼▲ buttons week value is set as 1,2,3,4 or last.

Third parameter is beginning day for the summer. With using ▼▲ buttons day is set.

Fourth parameter is beginning hour for the summer. With using ▼▲ buttons hour value is set.

Fifth parameter is beginning minutes for the summer. With using ▼▲ buttons minute value is set.

Sixth parameter is beginning month for the winter season. With using ▼▲ buttons, month value is increased or decreased. When desired value is reached, it is stored by pressing SET button

Seventh parameter is beginning week for the winter in chosen month. With using ▼▲ buttons week value is set as 1,2,3,4 or last.

Eighth parameter is beginning day for the winter. With using ▼▲ buttons day is set.

Ninth parameter is beginning hour for the winter. With using ▼▲ buttons hour value is set.

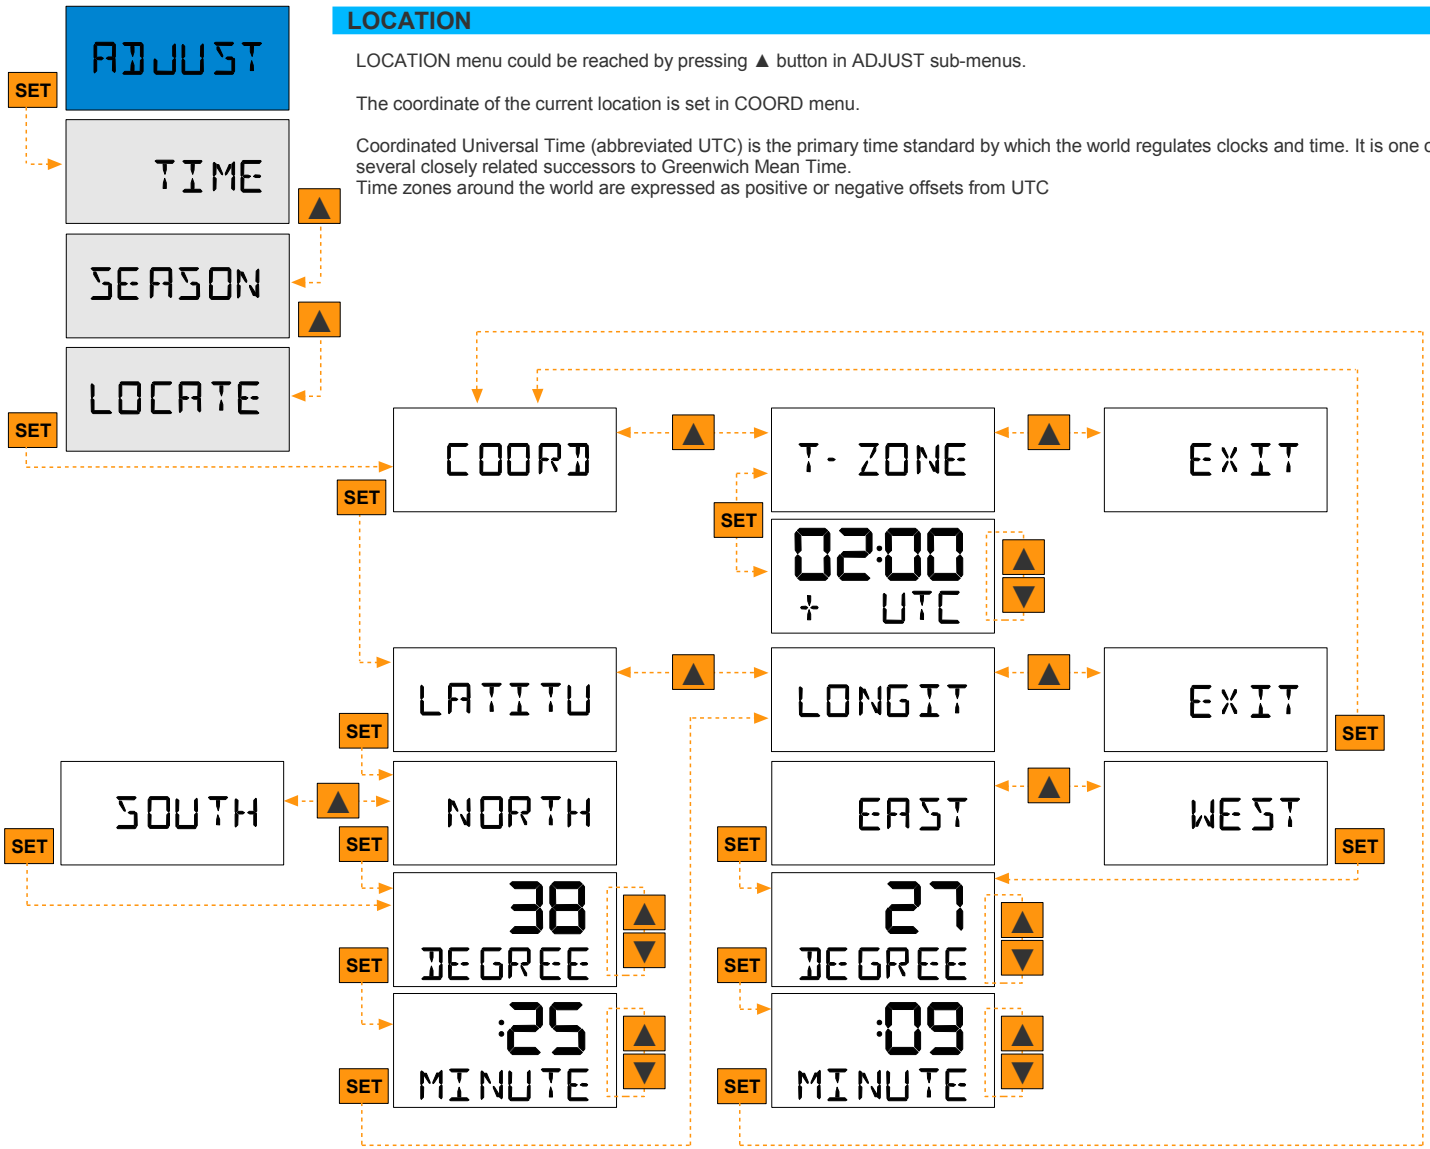

Tenth parameter is beginning minutes for the winter. With using ▼▲ buttons minute value is set.

LOCATION

LOCATION menu could be reached by pressing ▲ button in ADJUST sub-menus.

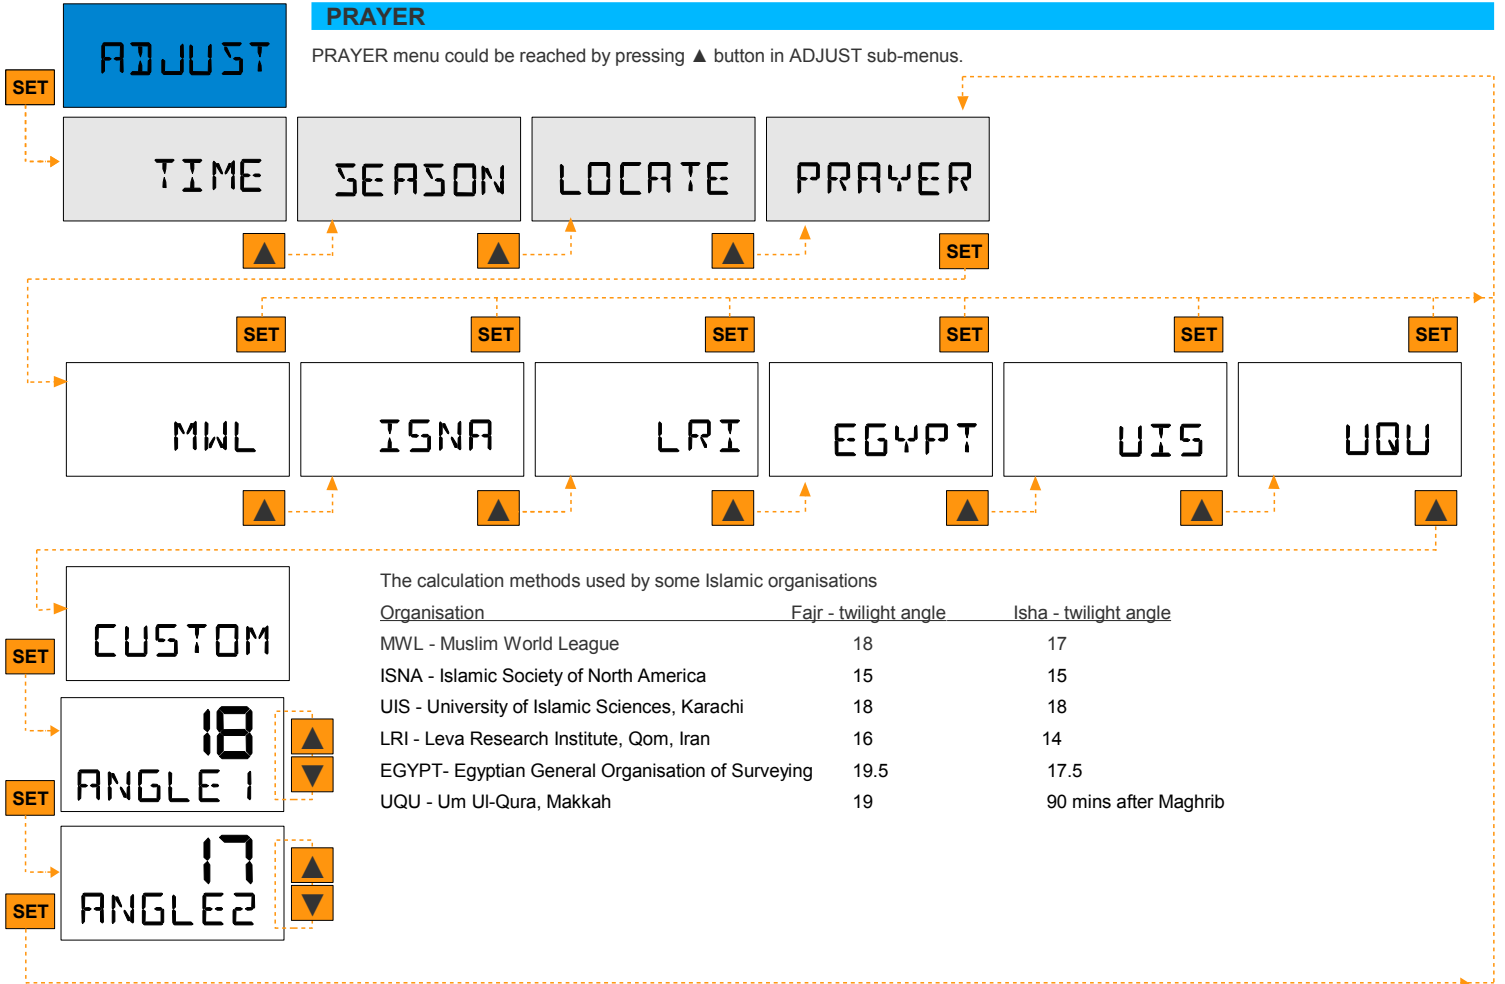

The coordinate of the current location is set in COORD menu.

Coordinated Universal Time (abbreviated UTC) is the primary time standard by which the world regulates clocks and time. It is one of several closely related successors to Greenwich Mean Time. Time zones around the world are expressed as positive or negative offsets from UTC

PRAYER

PRAYER menu could be reached by pressing ▲ button in ADJUST sub-menus.

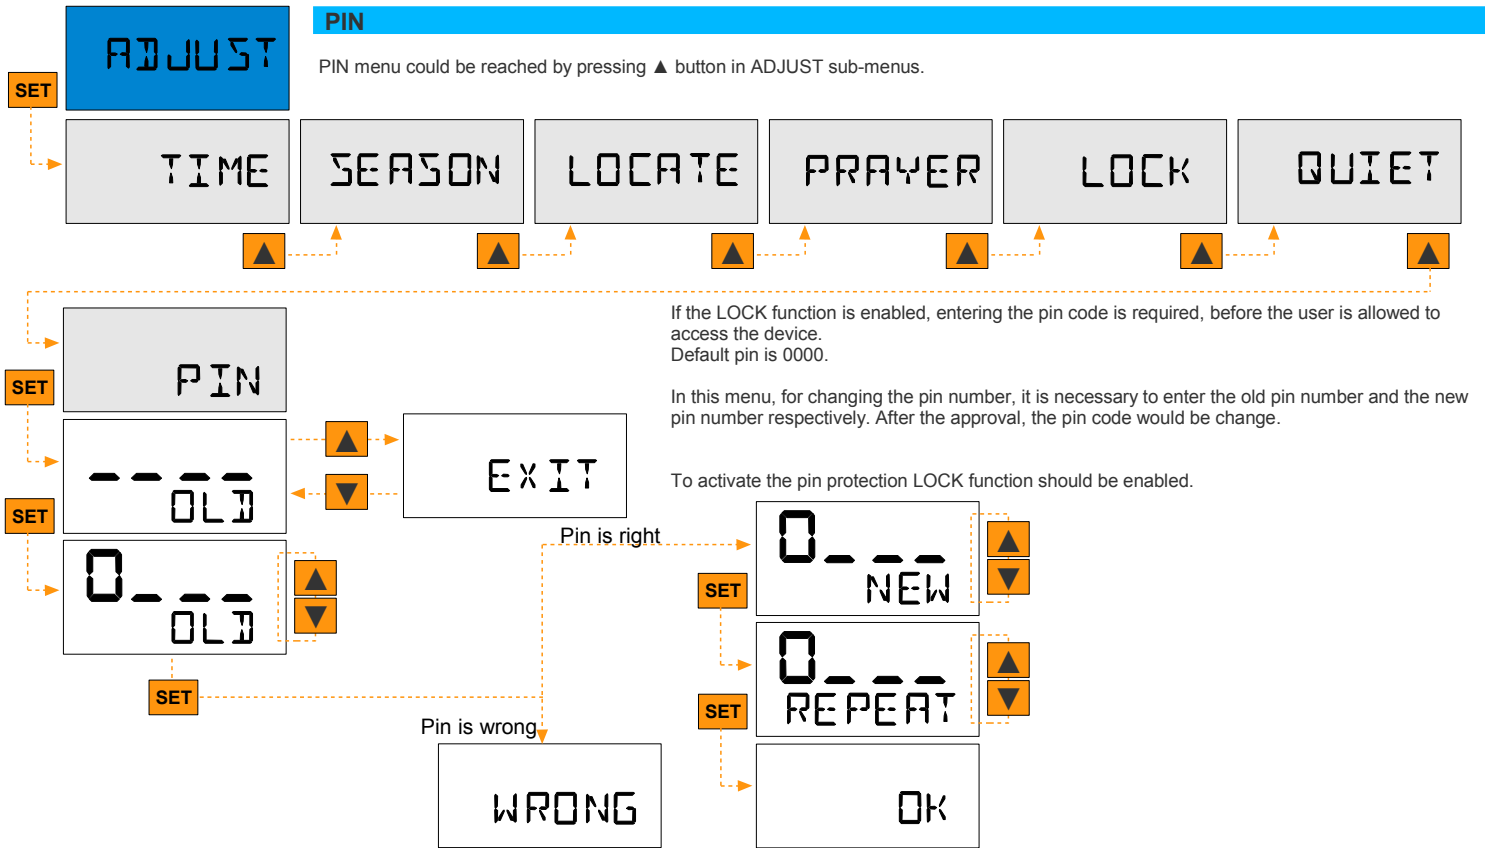

The calculation methods used by some Islamic organisations

Organisation	Fajr - twilight angle	Isha - twilight angle
MWL - Muslim World League	18	17
ISNA - Islamic Society of North America	15	15
UIS - University of Islamic Sciences, Karachi	18	18
LRI - Leva Research Institute, Qom, Iran	16	14
EGYPT- Egyptian General Organisation of Surveying	19.5	17.5
UQU - Um Ul-Qura, Makkah	19	90 mins after Maghrib

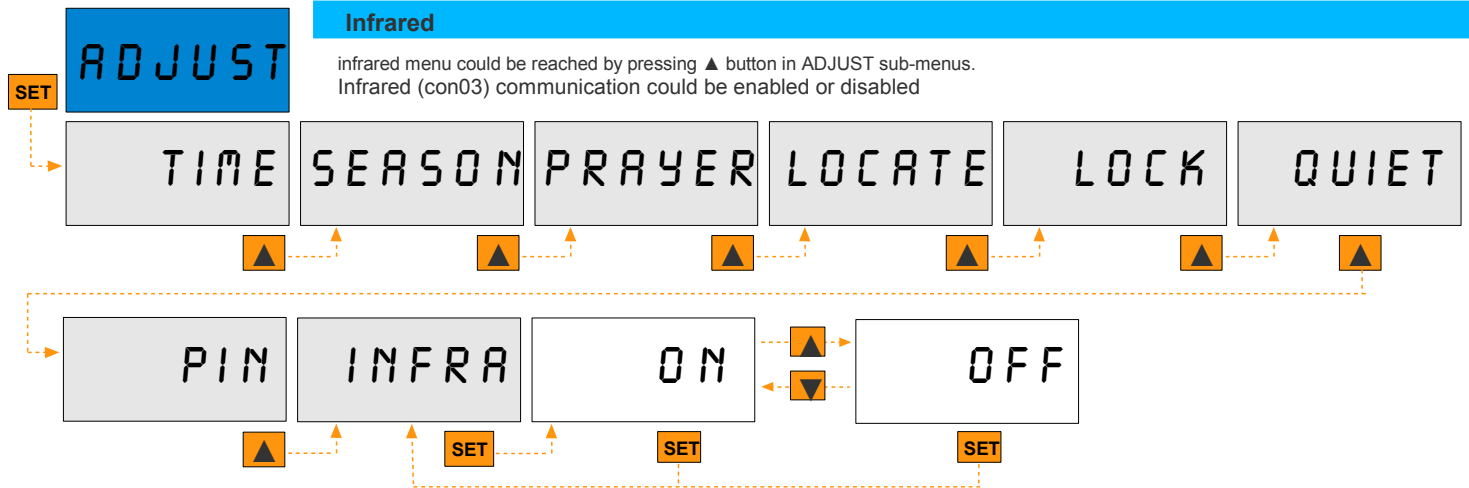

PIN

PIN menu could be reached by pressing ▲ button in ADJUST sub-menus.

Infrared

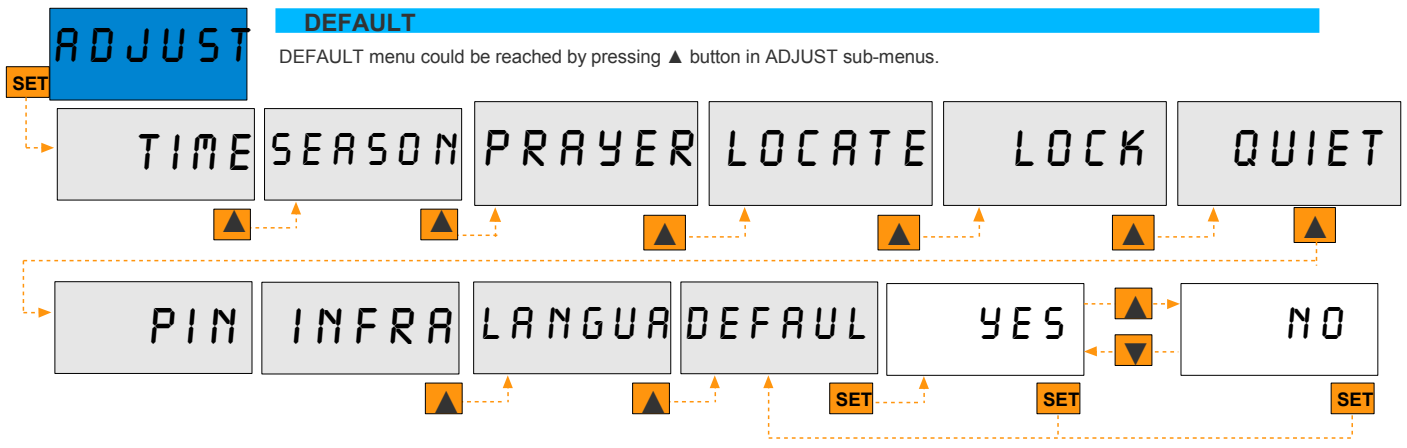

infrared menu could be reached by pressing ▲ button in ADJUST sub-menus. Infrared (con03) communication could be enabled or disabled

Language

Language menu could be reached by pressing ▲ button in ADJUST sub-menus. Language could be changed to turkish or english

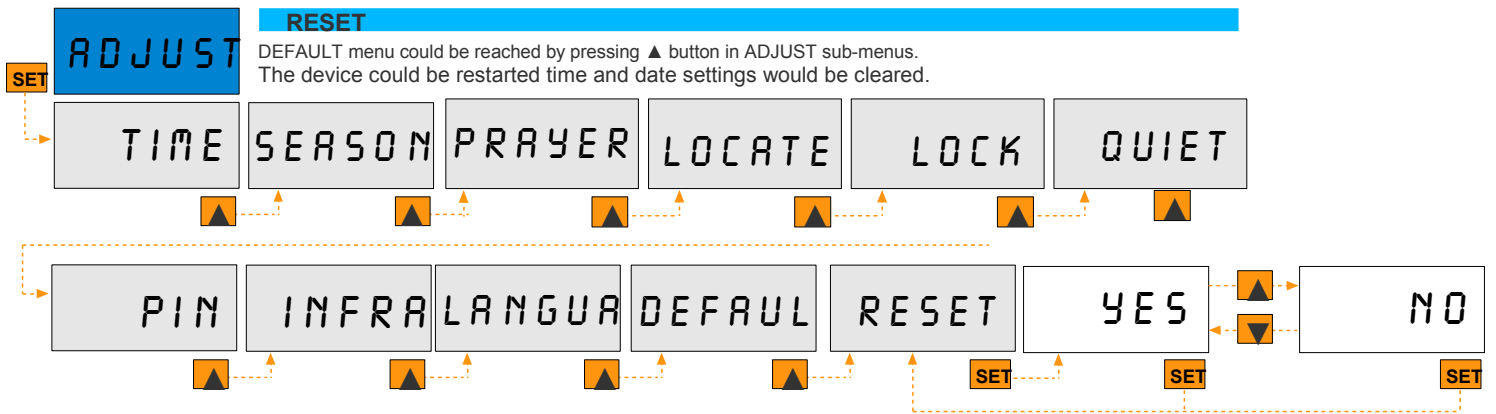

By restoring an ASTRO to factory defaults, following settings are installed.

Programs : 4 preset programs
 Lock A-B : Off
 Quiet A-B : Off
 Manual A-B : Off
 Season : Auto
 Location : !!!!!!!!
 Contrast : 7

NOTE:
 Reset an ASTRO to factory defaults does not change the pin code and the real time.
